PROFESSIONAL SUMMARY

Software Engineer and AWS-certified Cloud Practitioner with experience as a Full-Stack developer at Emmerce Ltd, Expert Software Engineering AI trainer at Pareto.AI, Back-end specialized developer associate at ALX Africa, and as a web developer and IT support specialist at a supermarket retailer.

I am enthusiastic about communicating technical aspects of my field to non-technical stakeholders and audiences.

ACHIEVEMENTS/ ACCOMPLISHMENTS

- Contributed to world-standard [SWE-bench verified](#) and led multiple E-commerce + SaaS web and mobile-app projects, architecting secure and efficient backend and frontend infrastructure in collaboration with 10+ team members.
- Drove a 30% annual revenue growth rate at a supermarket retailer as an assistant manager and IT Support specialist by digitizing operations while leading branding and marketing initiatives.
- Schneider Go Green Finalist 2023, AI for Green Published Research Project: [A Master-Slave Salp Swarm Algorithm Optimizer for Hybrid Energy Storage System Control Strategy in Electric Vehicles](#).

EXPERIENCE

Software Engineer, AI Training | Pareto AI | Stanford, California, USA | January 2024 – August 2025 (Remote)

- Training of AI Agents, improving logic and efficiency in executing computing tasks.
- Solved complex/competitive coding problems, writing functional, readable, and efficient solutions for AI training.
- Developed comprehensive tests to assess edge cases and verify the efficiency and effectiveness of peer-written AI training code.
- Created structured rubrics to guide the training of AI in generating code solutions, facilitating consistent and high-quality outcomes.
- Designed and developed an in-house web application aimed at gamifying the training and onboarding process for new workers.

Junior Software Engineer | Emmerce Ltd | Nairobi, Kenya | November 2023 – July 2024
(Hybrid)

- Problem definition, software solutions architecting, and leading project execution.
- Enhanced collaboration with external teams by proactively communicating decisions, challenges, and suggestions to improve the product development cycle.
- Accelerated production timelines by implementing secure, scalable, well-documented, and efficient backend solutions using microservices architecture in Django and FastAPI.
- Developing responsive SaaS web-apps and dashboards using Vue.js and Vuetify, focusing on elegance, functionality, and user-friendly design language.
- Collaboration with mobile app development teams to streamline backend support, enhancing native app functionality with a touch of AI flair.

Software Engineering Apprentice | ALX Africa | Nairobi, Kenya | October 2022 - October 2023 (Remote)

- Selected for a 12-month rigorous full-stack engineering apprenticeship program focused on programming, data structures, algorithms, and software design principles.
- Completed multiple training projects and hackathons.
- Applied theoretical knowledge to solve practical problems.
- Developed strong leadership and soft skills such as communication, teamwork, proactiveness, and problem-solving through collaboration with peers and mentors.

Assistant Retail Manager (& IT Support) | Value Chain Supplies, Eldoret, Kenya | February 2020 - April 2023 (Part-Time)

- Cut costs by 20% and improved operations efficiency by undertaking strategic acquisition, installation, integration, and maintenance of a Retail Management System and Surveillance systems.
- Increased brand visibility locally, boosting sales by developing the business website, e-commerce platform, and overall online presence. Crafted branding materials, including logos, banners, and promotional items, in line with the company's visual identity.
- Provided comprehensive technical support to 100+ end users, including staff members and customers, by resolving hardware, software, and network issues for internal staff and external customers.
- Cut technical issue response time by implementing a remote access system via VPN.

Student Engineering Intern (Full-time) | New Kenya Co-operative Creameries | Eldoret, Kenya | June 2021 - September 2021

- Enhanced the factory's IT environment by installing, troubleshooting, and maintaining computer hardware, software, and the factory's Network.
- Gained experience with motor overhaul, routine inspections, cleaning, and critical equipment repairs, effectively minimizing downtime and enhancing production efficiency.
- Improved workflow efficiency through process automation, systems design, and PLC programming.

SKILLS AND QUALIFICATIONS

- **Programming Languages:**
 - **Main** – Python, JavaScript, R, SQL
 - **Secondary** – MATLAB, TypeScript, Kotlin.
- **Software Development:** Web, REST APIs, DevOps, Data Structures and Algorithms, Agile Principles, Object Oriented Programming, Test Driven Development.
- **Tools & Frameworks:** Django, FastAPI, VueJS, React, NodeJS, AWS, PostgreSQL, MongoDB, MySQL, Docker
- **Electrical/Electronic design:** Embedded systems, Ladder programming, AUTOCAD
- **Interpersonal:** Communication, Open-Minded, Proactiveness, Problem-Solving, Time Management, Collaboration / Teamwork.

Languages:

- **English** - Native/Bilingual
- **Kiswahili** - Native /Bilingual

CERTIFICATIONS

- AWS Certified [Cloud Practitioner](#).
- Alx - Holberton School, [Certified Full-Stack software engineer](#).
- Naamal, International Labor Organization, [Workforce readiness for the Digital Economy Program](#).
- University of Nairobi, BSc. Electrical and Electronics Engineering.
- Huawei Certified Specialist Associate: Sales – Transmission & Access

EDUCATION

Master of Science in Advanced Computing with Artificial Intelligence
University of Stirling, Stirling, United Kingdom.
September 2026.

Coursework:

- Machine Learning, Statistics, Data Science, Computer Vision, Natural Language Processing.

Bachelor of Science in Electrical and Electronics Engineering
University of Nairobi, Nairobi, Kenya.
September 2022

Coursework:

- Control Systems, Machine Learning, Python Programming, Django Web Development, C, C++, PLC Programming, Embedded Systems Design.
- Published research project in [AI for energy consumption optimization in Electric Vehicles](#).
